Simple. Reliable. Rational.

UNIVERSAL AND MODULAR GRAPPLE „BEST GRIP“

www.modularis-drive.com

„BEST GRIP“

UNIVERSAL GRAPPLE

The grapple with the highest gripping power on the market with a patented asynchronous movement. The gripping jaw automatically adapts to the shape of the load during gripping.

Reliable in hard working conditions.

Fully enclosed chassis completely prevents damage to the mechanical-hydraulic drive.

Maximum safety at work - „Best GRIP“ gripping jaw design.

For demolition - fully closed grapple.

Especially suitable for universal sorting and load manipulation

High rotational power with brakes for manipulation of dangerous and heavy loads

„Best GRIP“ is a registered trademark of the Modularis TEH company.

Purposefully shaped prongs for a secure grip and easy handling
- EU model protection.

Optimal for handling wood,
logs and biomass

GRAPPLE ALLIGATOR

“

Tested for dangerous working conditions - fully enclosed chassis
- no damage during operation.

Demolition of steel structures and safe gripping of sharp steel profiles with the "Alligator" shape.

SCREENING BUCKET

Screening bucket for sorting natural and construction materials (gravel/soil/construction waste).

“

A tool for biomass handling, bale transport, agricultural land clearing and bank levelling for telescopic handlers (forklifts). Excellent manoeuvrability with tool rotation of approximately 360 degrees.

BIOMASS GRAPPLE

Clearing farmland

Manipulation of biomass

TREE SHEAR GRAPPLE

Easier and more efficient work - shears with approximately 180-degree rotation for professional use.

Fully enclosed chassis prevents damage to the mechanical-hydraulic drive and hydraulic oil spills for a clean environment.

Felling trees and wood

EU-patented cutting system

“

For clearing overgrown farm and grazing land, clearing bushes, cutting trees.

“

Higher work speed - Innovative two-blade cutting principle, EU patent.

TREE STUMP SPLITTER

“

A simple and effective tool for clearing the forest after the harvest. It tears and splits stumps and is suitable for use in extremely difficult working conditions.

„RIPPER“ - RAKE FOR TREE STUMPS

SAW MODULE IN COMBINATION WITH THE GRAPPLE

GRAPPLE FOR TIMBER

“

Quick and easy work - Maximum timber gripping volume and optimum profile of the gripping jaws.

BASIC
UNIVERSAL SORTING GRAPPLE

“ Less weight.

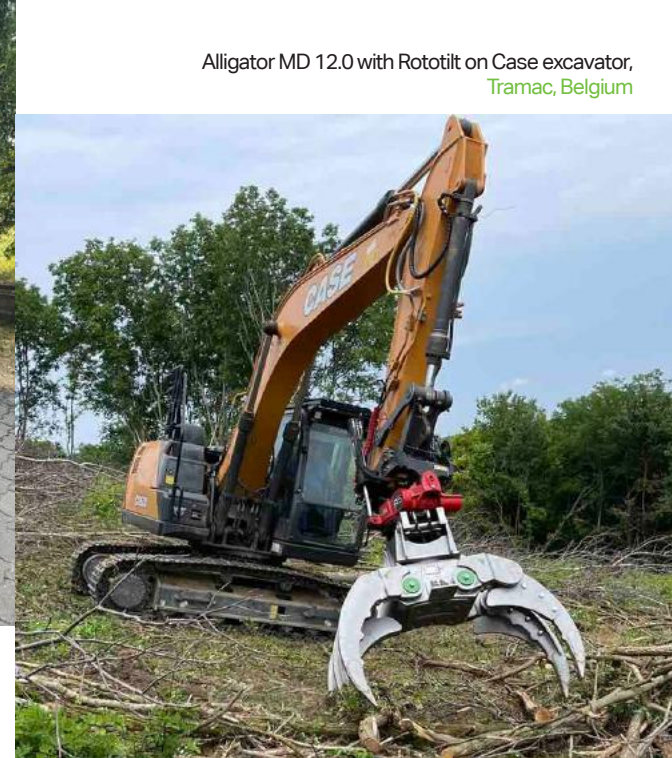

More power for precise load sorting.

Fully enclosed drive for reliable operation.

** BASIC version
Grapple is not upgradable

Alligator MD 12.0 with Rototilt on Case excavator,
Tramac, Belgium

Tree Shear Grapple MD 9.0 Combo package
with NOX Tiltrotator on JCB excavator,
AG Agrartechnik, Germany

LOADING GRAPPLE FOR BULK MATERIALS

MOBILE CONNECTION

Best Grip MD 25.0 on Liebherr machine,
Landbau, Czech Republic

MODULARIS DRIVE AROUND THE WORLD

Alligator MD 20.0, Komatsu machine,
Traktoristy, Russia
